The lectures and forums committee did not have any new members join this year. The budget we received was \$5,000. We sincerely appreciate the decision of the Faculty Senate to fund this budget this year as it allows us to support the excellent programming put on by the faculty.

This year we issued a call for proposals centered around a particular theme. This year's theme was, "Fostering and Promoting Community Engagement." We funded four proposals at \$500 each, using \$2,000 of our total budget.

One area for the committee and Faculty Senate steering committee to consider going forward is the best way for the committee to help publicize funded events. In addition to updating the Steering Committee about funded events, some other options to consider might be coordinating access to the university calendar so that funded events could be advertised there or having information on funded events available on the committee webpage. The current chair is rolling off the committee and the **new chair will be Sharyn O'Mara.**

There is only one member rotating off the committee after this year: Kathryn Fritz
