The committee conducted a survey of self-identified faculty with disabilities. We received 92 responses. We also conducted a focus group to get feedback from faculty who were willing to participate.

The committee reviewed results and are still in the process of formulating recommendations. Parking seems to stand out as a concern.

Results of the survey have been shared with HR and we are awaiting their feedback

In the fall we will formulate recommendations and will also begin to consider additional issues such as how to better assist faculty in including students with disabilities in their classes

The committee has added two members for the fall as well as replacing our student representative who graduated

S. Kenneth Thurman
